Profile

Final-year B.Tech Information Technology student focused on **Cloud/DevOps** and **backend engineering**, with hands-on **full-stack development** experience. Builds and deploys production-style systems using **AWS, Docker, Kubernetes, Terraform**, and **CI/CD** pipelines, alongside **Node.js/Express, React**, and **REST APIs**. Actively building **AI-powered** (LLM, RAG) automation for cloud operations and full-stack applications.

Technical Skills

- **Languages:** Java, C++, JavaScript, Python, SQL, Bash
- **Backend:** REST APIs, JWT Authentication, Node.js, Express.js
- **Frontend:** React, HTML, CSS, JavaScript
- **Cloud / DevOps:** AWS, Linux, Git, GitHub, Docker, Docker Compose, GitHub Actions, Terraform, Kubernetes, Ansible
- **Databases:** MongoDB, MongoDB Atlas, PostgreSQL, MySQL, Redis
- **Monitoring:** Prometheus, Grafana, AWS CloudWatch

AI Tools & Concepts

- **LLMs, RAG** (Retrieval-Augmented Generation), **Vector Embeddings** & Semantic Search, **MongoDB Atlas Vector Search**, **Agentic Workflows**, **MCP** (Model Context Protocol), Prompt Engineering

Projects

- **Venuro — AI-Powered Entertainment Discovery & Booking Platform**
React, Node.js, Express, MongoDB, Redis, JWT, RAG, MongoDB Atlas Vector Search, Docker, AWS, GitHub Actions
 - Built a **full-stack MERN platform** for discovering and booking movies, concerts, sports events, and live shows, with a role-based **admin analytics dashboard**.
 - Implemented **JWT authentication**, **Redis-backed temporary seat locking**, and **double-booking prevention**, along with cancellation/refund flows and **QR-based digital tickets**.
 - Designed a **RAG-powered AI assistant** using **vector embeddings** and **MongoDB Atlas Vector Search** for natural-language discovery, personalized recommendations, and Q&A.
 - Deployed with **Docker** and **AWS**, automating builds and releases through **GitHub Actions CI/CD**.
- **SecureDeploy — DevSecOps Cloud Deployment Platform**
AWS, Terraform, Docker, Kubernetes/EKS, GitHub Actions, Prometheus, Grafana
 - Designed an automated **CI/CD pipeline** with security-gated testing, container delivery, and **Kubernetes (EKS)** deployment on **AWS**.
 - Provisioned cloud **infrastructure as code** using **Terraform**, with **Prometheus/Grafana** monitoring, dashboards, and alerting.
- **CloudSage AI — Cloud Incident RCA & Automation Assistant**
AWS, Python, Boto3, CloudWatch, EventBridge, SQS, Lambda, MCP
 - Built an **agentic DevOps assistant** that performs automated **root-cause analysis** by correlating logs, metrics, and deployment evidence.
 - Designed an **event-driven AWS architecture** (Lambda, EventBridge, SQS) with **LLM orchestration via MCP** and human-approved remediation workflows.

Experience

- **Cisco AI Virtual Internship**
Virtual
 - Completed practical learning focused on core **AI concepts and tools**, with supporting exposure to **cloud** and technology workflows.
 - Explored how **AI tools** work and how they integrate with **full-stack development**, applying that understanding to problem-solving exercises.

Certifications & Achievements

- **Anthropic** — AI Fluency for Students, Certificate of Completion
- **Cisco** — AI Virtual Internship, Certificate
- Participant, **Smart India Hackathon (SIH) 2025**
- Solved **300+** Data Structures & Algorithms problems on **LeetCode** (Arrays, Strings, DP, Graphs)
- CGPA: **8.25 / 10** — B.Tech Information Technology, MIT Academy of Engineering

Education

- **MIT Academy of Engineering, Alandi, Pune** 2024 – 2028
B.Tech in Information Technology — CGPA: 8.25/10
 - Class XII: 80.50% | Class X: 89.80%

Career Focus

- **Primary:** Cloud / DevOps / SRE | **Secondary:** Java Backend / Full-Stack Development | **Interview Prep:** C++ / DSA
